

Land of Change

Stop living life with your head in the clouds

Open up your eyes take a look around

Everyone looks out just for their own

No one seems to think that this is wrong

There's people dying everyday

Things don't have to be this way

Something's wrong with this picture

This is not a permanent fixture

(CHORUS)

It's the land of change

It's the land of change

It's the land of change

It's the land of change

They're out of sight out of mind

But there's no excuse to turn a blind eye

If the tables were turned would you still be the same

Your first to point the finger but except no blame

If only you took a step outside of your shell

You'd take a hard long look at yourself

Something's wrong with this picture

This is not a permanent fixture

(CHORUS)

It's the land of change

It's the land of change

It's the land of change

Everybody make a change today

Everyone looks out just for their own

No one seems to think that this is wrong

There's people dying everyday

Things don't have to be this way

(CHORUS)

It's the land of change

It's the land of change

It's the land of change

Everybody make a change today
