

Despite

See the sun rising

See the clouds floating

But I don't see like before

Suddenly I adore

Everything about the world

You've changed my life I'm grateful

I would do anything to be with you for all time

But then the clouds formed to rain on me.

Paradise is gone you're leaving

It's all my fault

it's inevitable

(CHORUS)

Despite the fact that I need you baby I only wanna do what's best for you

Despite the fact I wanna be with you baby I only want to do what's best for you.

You don't know how I feel

You've changed my life this is real

This is a fairytale I thought that wouldn't come true

I was numb I was raw

Had nothing to live for

I was lost now I'm found

All things up must come down

But then the clouds formed to rain on me.

Paradise is gone you're leaving

It's all my fault

it's inevitable

(CHORUS)

Despite the fact that I need you baby I only wanna do what's best for you

Despite the fact I wanna be with you baby I only want to do what's best for you.

I'll be dreaming of you on those summer nights

I hope you dream me too so we just might

Meet in that place we'll be just fine

Our dreams will collide and you'll be mine

(CHORUS)

Despite the fact that I need you baby I only wanna do what's best for you

Despite the fact I wanna be with you baby I only want to do what's best for you.

I only want to do what's best for you

I only want to do what's best for you
